SOFTWARE DEVELOPERS' THURSDAY

Stefano Seppi

Nature of Innovation.

TECHPARK SÜDTIROL/ALTO ADIGE

STRATEGY HOUSE DIGITAL
VISION STATEMENT 2030

2030
Establish the digital backbone
to enable smart green regions.

IOT (INTERNET OF THINGS)
DATA COLLECTION

IoT and Edge Computing create an environment in which micro-computers are all around us. This transforms the way computation is done, more on the edge or in the fog. New challenges like "OTA Programming Strategies", "Cyber-Security Risk Mitigation" and "Blockchain" will become key for a sustainable digital environment.

OPEN DATA HUB
DATA SHARING AND COMMUNITY

Software Development is rapidly changing, topics like Agile Software Development, Continuous Compliance, Licensing, … require a strong competence in Open Source, Open Standards and Open Data to connect as many systems as possible and to open up data silos. Enabling the involved companies and research institutions to gain visibility and increase the ROI for their I&R&D activities.

AI (ARTIFICIAL INTELLIGENCE)
DATA PROCESSING

Hyperconnected Services enable new Business Models like XaaS, everything as a service. MaaS is already in development and deep learning will change how users will be involved in the customer journey.

EXCELLENCE   **PIONEERING**   **SUSTAINABLE**
