

SELECTION OF START-UPS AT THE FUSE 2024 EXHIBITION SPACE

profarms

PROFARMS

The startup's Vertical Farming System enables location- and time-independent, sustainable and highly automated plant growth in a controlled indoor environment.

S Q L O S

SOLOS

Solos specialises in aquaponics, a sustainable and future-oriented system. It combines vegetable cultivation and fish farming, thus generating a closed system in which water consumption is drastically reduced.

viomed

VIOMED

Viomed specializes in developing, manufacturing, and marketing foods for specific medical purposes, focusing on food allergies in children and infants and rare congenital disorders of metabolism.

FOOD & HEALTH

SELECTION OF START-UPS AT THE FUSE 2024 EXHIBITION SPACE

ARXAX

Arxax supports logistics companies in the green transition of their fleets, focusing particularly on hydrogen. It develops digital solutions for the construction and management of intelligent low-carbon infrastructures.

FLEXYGRID

FlexyGrid provides an energy efficiency management platform aimed at optimising system flexibility to support renewable energy investments and the decentralised transition to green energy, with the goal of establishing Renewable Energy Communities (RECs).

PLANTVOICE

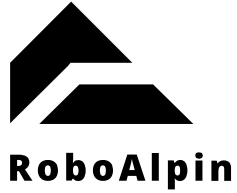

The internationally patented technology of Plantvoice reads sap flow and salinity in plants. The aim is to maintain plants healthy and optimise water and fertiliser use, helping growers to reduce costs and maximise production.

SHER

SHER is an innovative, performing and stylish women cycling and sports apparel brand.

SELECTION OF START-UPS AT THE FUSE 2024 EXHIBITION SPACE

ROBOALPIN

RoboAlpin has developed a semi-autonomous, battery-powered mowing robot for steep terrain, with the aim of simplifying and increasing the efficiency and safety of mountain farmers.

REVEON

The electric revolution straight out of Venosta. REVEON develops, produces and distributes revolutionary, all-electric off-road motorbikes with intelligent software solutions for top-level sport, as well as for road traffic.

SELECTION OF START-UPS AT THE FUSE 2024 EXHIBITION SPACE

AIAQUA

AIAQUA's goal is an efficient and sustainable management of water resources, based on the latest results of scientific research in the field.

FORTISSIMO

Fortissimo aims to bring together technological innovation, multimedia learning and live concerts: through its app, the company offers young users a dynamic and interactive experience in which they can discover the instrumental music scene and acquire diverse learning strategies.

DATTECO

The startup is developing a new management tool for hotels that uses business intelligence (BI) technology and artificial intelligence (AI).

KARRYFAST

Karryfast focuses on digitising and streamlining urgent transport services through a software solution powered by AI and blockchain, to automate and improve freight forwarding processes.

NANEA

Nanea's digital platform aims to transform the connection between customers and restaurateurs in the out-of-home dining space by digitising payment options and simplifying processes.

KIBUN

Kibun with its software collects data on employee mood and the level of collaboration, analysing the data and ultimately supporting the planning and implementation of action strategies.

**STORY
BLOX**

MEDIATIZE

Storyblox allows content creators and authors to easily curate engaging, high-quality guided tours that provide museum visitors with a unique, interactive and entertaining experience.

YouAddict

YOUADDICT

YouAddict has developed an app that helps users organise their existing wardrobe, optimise their buying choices and adopt more sustainable behaviours that minimise the environmental impact of the fashion industry.

WITTY
KEEP IN POWER

WITTY

Witty is an innovative start-up that developed a system (Patent) to increase the life cycle of lithium batteries in electronic devices.
